## THE DONT'S

- 1) Don't sit on the edge of a mattress.
- 2) Don't allow your mattress to get wet.
- 3) Don't use dry - cleaning fluid of any type to clean your mattress.
- 4) Don't place a board between your mattress your box spring - it can interfere with the supporting function of the box spring.
- 5) Don't let children jump on the bed. Undeniably good advice, but no fun either.
- i) Don't dry clean. The chemicals in dry cleaning agents / spots removers may be harmful to the fabric or underlying materials. Vacuuming is the only recommended cleaning method . But if you're determined to tackle a stain , use mild soap with cold water and apply lightly. Do not ever soak a mattress or foundation.
- ii) Don't remove the tag. Contrary to popular belief, it's not illegal to remove the law tag , but the information on the label will serve as a means of identification should you have a warranty claim.
- iii) It's not a trampoline. Don't let the kids jump on your sleep set. Their rough - housing could do damage to the interior constructor of your bed, as well as to themselves.
- iv) No boards, please. Never put a board between the mattress and information. It may enhance the sense of support for a while, but it will only make the problem worse over time. When any bed in your home has reached the "board stage", get rid of it.
- v) follow manufacture's instructions, Again be sure to follow any specific guidelines from your manufacture for the best method of mattress care.
- vi) Out with the old. Now you have treated yourself to a new sleep set arrange to have your old bed removed and disposed of don't give to the kids, relative guests or neighbors. If it was not good enough for you, it is not good enough for any one else. Throw it out .

## THE DO'S

- 1) Proper Installation . Make sure your new mattress and foundation are properly installed in your home . Improper installation can damage your new sleep set. If you choose to transport and install on your own, ask the store personnel to give you some tips to help you avoid problems.
- 2) Rotate it. Unless your mattress care instruction indicate otherwise , you may want to periodically rotate your mattress from end to end and from top to bottom.
- 3) Use a protective pad. A good quality, washable mattress pad (and one for the foundation, too, if you like) is a must to keep your set fresh from, stains .
- 4) Let it breathe . If you detect a slight "new product" odor, leave the mattress and foundation uncovered and well ventilated for a few hours. A breath of fresh air should do the trick.
- 5) Give it good support. Be sure to use a sturdy, high quality bed frame. If it's a queen or king size set, make sure your frame has the strong center support that will prevent the mattress from bowing or breakage.
